

PAI CLASSICS

SURFACE FINISHING SOLUTIONS For Metal & Plastic Surfaces

Covering Optical Frames / Spectacles, Buttons, Fashion Accessories, Jewellery, Pots, Cutlery, Watch, Pen, Bathroom & Kitchen Accessories, Automobiles, Blades and various other Metal & Plastic Parts manufacturing industries.

PAI CRISTAL ITALIA's Pai Classics range of polishing compounds is the result of continuous Researches & Development in close coordination with some of the well renowned & established MNCs across the world.

The vast range of products for different specific surface finishing requirements of various industrial sectors is the outcome of experience and continuous development over the years since 1965. New requirements and different needs in accordance with the ever-changing market have engaged the company in the research and creation of innovative products that guarantee an excellent finish on every treated material or the surfaces.

Our new range has been researched, tested and used in accordance to various material properties, so they always assure best results for each type of surface finishing. Thus both for wet and dry processes PAI CRISTAL ITALIA can provide the right solution to achieve the best results in terms of time & Quality.

Important challenge of the company has been to find out innovative solutions and offer range of products including media, emulsions, cleaners and machinery for every kind of material. Moreover our manpower is well equipped to provide technical assistance and tailored made support according to the customer requirements.

PAI CLASSICS - PLASTICS GRINDING, POLISHING & SHINING COMPOUNDS For PLASTICS SURFACE PROCESSING

PO5

GRINDING COMPOUND

Grain: Coarse **Colour:** Light – Grey Power: Aggressive

Effect: Mat and homogeneous surface

Features: Aggressive compound that leaves a regular surface

Package: 10, 15, 30 Kg Pail/Can

GLOSS LEVEL

LP 200

SMOOTHING COMPOUND

Grain: Fine Colour: Grey Power: Medium Effect: Flat surface

Features: Smoothing compound perfect for 4 step process

Package: 10, 15, 30 Kg Pail/Can

CUT LEVEL

GLOSS LEVEL

K40

SMOOTHING COMPOUND

Grain: Fine Colour: White Power: Smooth

Effect: Homogeneous and Flat surface

Features: Standard solution for 3 step process

Package: 12, 18, 30 Kg Pail/Can

CUT LEVEL

GLOSS LEVEL

M114

SMOOTHING 'N' SHINING COMPOUND

Grain: Fine Colour: White Power: Medium

Effect: Soft Grinding effect, removes imperfections **Features:** Ideal for injection frame smoothing

Package: 10, 15, 30Kg Pail/Can

CUT LEVEL

GLOSS LEVEL

SHINING COMPOUND

Grain: Fine Colour: White Power: Soft

Effect: Shining surface with slight smoothing effect

Features: Good for any request of shining

Package: 10, 15, 30Kg Pail/Can

CUT LEVEL

GLOSS LEVEL

K55

SHINING COMPOUND Grain: Ultra Fine Colour: White Power: Super Soft

Effect: Very Bright & Glossy Surface Features: Effective on soft & hard plastic Package: 10, 15, 30 Kg Pail/Can

GLOSS LEVEL

PaiClassics

PAI CLASSICS – METALS GRINDING, POLISHING & SHINING COMPOUNDS For METAL SURFACE PROCESSING

MSA

GRINDING COMPOUND

Grain: Coarse **Colour:** Dark Brown **Power:** Aggressive

Effect: Homogeneous Surface

Features: For Grinding SS to Titanium or hard metals

Package: 12, 18, 30 Kg Pail/Can

MS

GRINDING COMPOUND

Grain: Coarse Colour: Brown Power: Aggressive

Effect: Mat & Homogeneous Surface

Features: For Grinding SS to Titanium or hard metals

Package: 12, 18, 30 Kg Pail/Can

SMS

GRINDING COMPOUND Grain: Medium Coarse Colour: Light Grey Power: Medium Aggressive

Effect: Mat & Homogeneous Flat Surface

Features: For Grinding a range of hard to medium metal surfaces

Package: 12, 18, 30 Kg Pail/Can

CUT LEVEL

GLOSS LEVEL

GLOSS LEVEL

GLOSS LEVEL

LP88

SHINING COMPOUND Grain: Medium Fine Colour: Light Pink Power: Soft

Effect: Homogeneous and Shining Surface **Features:** Shining with Light Smoothing effect

Package: 10, 15, 30 Kg Pail/Can

CUT LEVEL

GLOSS LEVEL ----

MBA55

HIGH SHINING COMPOUND

Grain: Ultra Fine Colour: White Power: Soft

Effect: Very Bright Glossy Surface & Protects against Oxidation

Features: Perfect Solution for Final Finishing Step

Package: 10, 15, 30 Kg Pail/Can

CUT LEVEL

GLOSS LEVEL -

PaiClassics

PAI CLASSICS – JEWELLERY GRINDING, POLISHING & SHINING COMPOUNDS For SOFT METAL SURFACE PROCESSING

NR

SMOOTHING PASTE

Grain: Fine Colour: Ochre Power: Soft

Effect: Homogeneous & Shining surface **Features:** Smoothing paste for Soft Metal Surface

Package: 6, 12, 18 Kg Pail/Can

D11

SHINING PASTE Grain: Very Fine Colour: White

Power: Smoothing & High Shining **Effect:** High Bright Glossy Surface

Features: Shining Paste for Soft Metal Surface

Package: 6, 10, 15 Kg Pail/Can

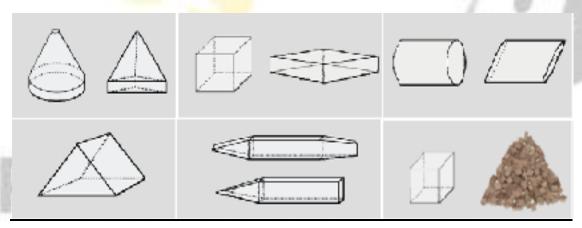

PAI CLASSICS - POLISHING MEDIA

There are four important factors to get a good finishing result: Shape & Size of the work piece, Material of the work piece, Process Requirement (Deburring, Grinding, Smoothing, Shining etc) and the Ratio of the abrasive stone and the work piece. A high quality selection of materials for polishing ensures good quality production, for details please visit our website www.paicristal.com or contact us.
